

Summer Internship Program 2025

Unlock Your Potential in Research & Development!

Looking to jumpstart your career in R&D?

Join PSI, an employee-owned company, this summer and gain hands-on experience in innovative research, cutting-edge development, and real-world applications! Our internship program provides valuable exposure to the R&D environment, helping you build your skills and your professional network.

Why Choose Us?

- **Employee-Owned Company:** As an employee-owner, you'll be part of a team where every contribution matters and success is shared.
- **Innovative Projects:** Work on real-world challenges in the tech, engineering, and science fields.
- **Mentorship:** Learn from top experts and seasoned professionals in the R&D industry.
- **Career Development:** Gain skills and insights that set you apart in your field.
- **Networking:** Connect with industry leaders, colleagues, and fellow interns.
- **Competitive Stipend:** Get paid while you learn!
- **Professional Development:** Attend internal seminars and enhance your knowledge and professional growth during your internship.

Internship Program Highlights:

- **Internships for 18-25 Students:** PSI hosts 18 to 25 interns each summer, with placements at various locations in Massachusetts and New Hampshire. Interns may have the option to extend into the academic year.
- **Resume-Building Experience:** Gain real-world experience and valuable professional development that will bolster your resume.
- **Seminars and Networking:** Interns will attend seminars, providing the chance to connect with staff and enhance your learning.
- **Intern Symposium:** At the end of the program, interns will present their work at a company-wide symposium, creating posters summarizing their projects to share with the PSI team.
- **Path to Full-Time Employment:** The greatest success for us is seeing interns mature as professional scientists and engineers after graduation!
