

# VERMA LAB RECRUITS

**PURDUE**  
UNIVERSITY

Engineering microbiomes and using nanotechnology  
for improving health

Research Projects (Starting in January 2018):

- Develop an in vitro model for the gut microbiome
- Use diet to manipulate the microbiome
- Use nanotechnology to characterize microbiomes

Lab Location:

Birck Nanotechnology Center

Positions Available:

- Postdoctoral Fellow
- Graduate Student
- Undergraduate Student
- Lab Technician

Affiliation:

Department of Agricultural and  
Biological Engineering
