Graduation Day
Summer 2016

Mark Shaw

Distinguished Technologist

B.Sc. Printing Technology, 1997
University of Hertfordshire, UK

Moved to USA

Research Intern
Xerox, Webster, NY

M.Sc. Color Science, 1999
Rochester Institute of Technology

Married Sally

Moved to Austin, TX

Research Engineer
1999 : Applied Science Fiction, Austin TX

Research Engineer
2001: Xerox Engineering Systems, Santa Clara, CA

Research Engineer
2003 : Hewlett Packard, LaserJet Division, Boise, ID

Expert Engineer
2007 : Hewlett Packard, LaserJet Division, Boise, ID

Non-Degree Seeking
2005-2010 Boise State University

HPICS Affinity Group Technical Chair
Hewlett-Packard Co

Master Architect
2011 : Hewlett Packard, LaserJet Division, Boise, ID

Distinguished Technologist
HPS, HP Inc.
2019 Boise, ID

Distinguished Technologist
2018 : HP Inc, Office Product Division, Boise, ID

Moved to Boise, ID

ECE Industrial Advisory Board
Boise State University
Rochester Institute of Technology

Adjunct Professor, 2017
Image Processing, BSU ECE Department

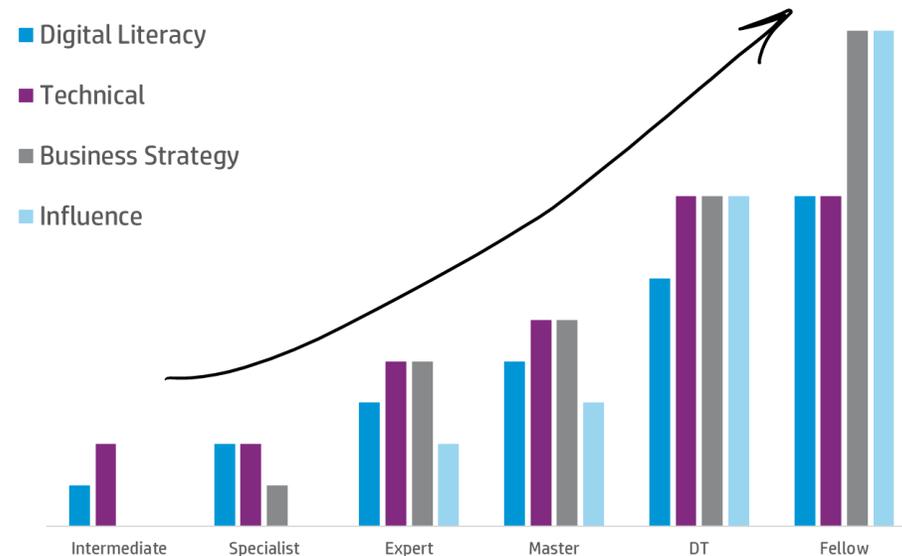

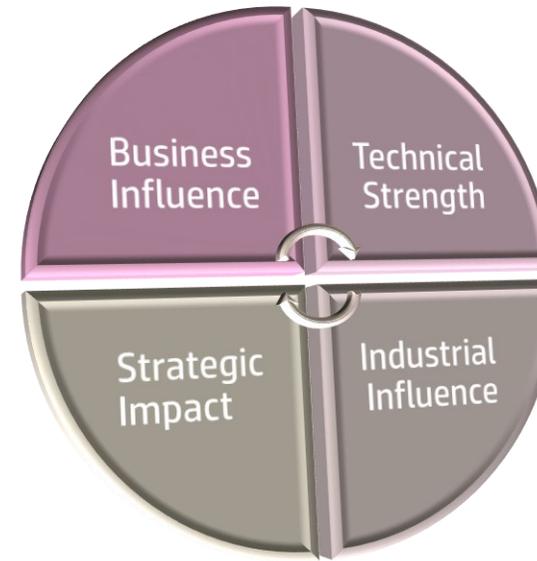

Ph.D. ECE Signal Processing 2015
Purdue University

Reflect on the future

The TCP Journey to Customer Value

- Starts long before your start writing a packet
- Key points ...
 - Each level has a clear set of attributes that are being looked for to advance to the next level
 - The higher you advance, the value to the business becomes much more of a factor
 - As engineers it is easy to focus on the details ... DON'T
 - Step out of the details to look at the big picture ... how are you personally contributing to the business?

Things that I have learned along the way

- Integrity is a core value
- You don't have to know everything ... there are others that you can rely upon
- Know when to pick your battles
 - Treat others with respect even when you disagree, especially cross culture
 - Listen twice as much as you speak
- Be willing to acknowledge when you are wrong
- Tailor your communication style to your audience

Thank you
